vinayakrathore441@gmail.com

PROFILE

A Developer with hands-on experience in **Python programming, data analysis, and building projects using Python**. Experienced in working on real-world projects, data handling, and problem-solving using Python. Familiar with **Python libraries** such as Pandas, NumPy, and visualization tools, and have implemented machine learning models for prediction tasks. Passionate about **continuous learning, writing clean Python code**, and growing into a strong software engineer in the IT industry

.EXPERIENCE

Developer - **GenkaiX**
Sep 2025 – Mar 2026

- Worked on Python projects, focusing on data handling, automation, and backend development
- Developed scripts and small applications using Python and libraries like Pandas and NumPy.
- Fixed UI bugs, improved performance, and enhanced user experience
- Used Git for version control and Visual Studio Code as the primary development environment

SKILLS

Programming Languages

- Python
- Basic of React

DATABASE

- MYSQL

Web Development

- HTML
- CSS
- JavaScript

Soft Skills

- Problem-Solving
- Team Collaboration
- time Management

EDUCATION

Bachelor of Technology in Computer Science (Data Science) CGPA- 6.5
Shri Vaishnav Vidyapeeth Vishwavidyalaya Indore 2021-2025

Higher Secondary Certificate
NEW FATHER ANGEL H S SCHOOL Indore
Grades- 76% 2021

Secondary School Certificate
NEW FATHER ANGEL H S SCHOOL Indore
Grades- 75% 2019

PROJECTS

Travel Website

Developed a comprehensive travel website using HTML, CSS, JavaScript, PHP, and MySQL . Designed a responsive front-end interface and implemented server-side processing with PHP. Managed data storage and booking details through a MySQL database, using Visual Studio Code as the development

Top 5000 YouTube Channels Analysis

Analyzed the top 5000 YouTube channels using a Kaggle dataset to uncover trends in content, subscriber growth, and video performance. Performed data cleaning, manipulation, and analysis using **Pandas** and created visualizations using **Seaborn** to represent trends such as popular categories and engagement metrics.

Red Wine Quality Detection

During my industrial training, developed a machine learning model to predict the quality of red wine based on chemical properties using a public dataset. Conducted comprehensive data analysis and visualizations to identify key relationships between features and wine quality. Implemented classification algorithms to achieve accurate predictions, contributing to data-driven decision-making in the wine industry
